

Masai Dummy Payment

Instructions

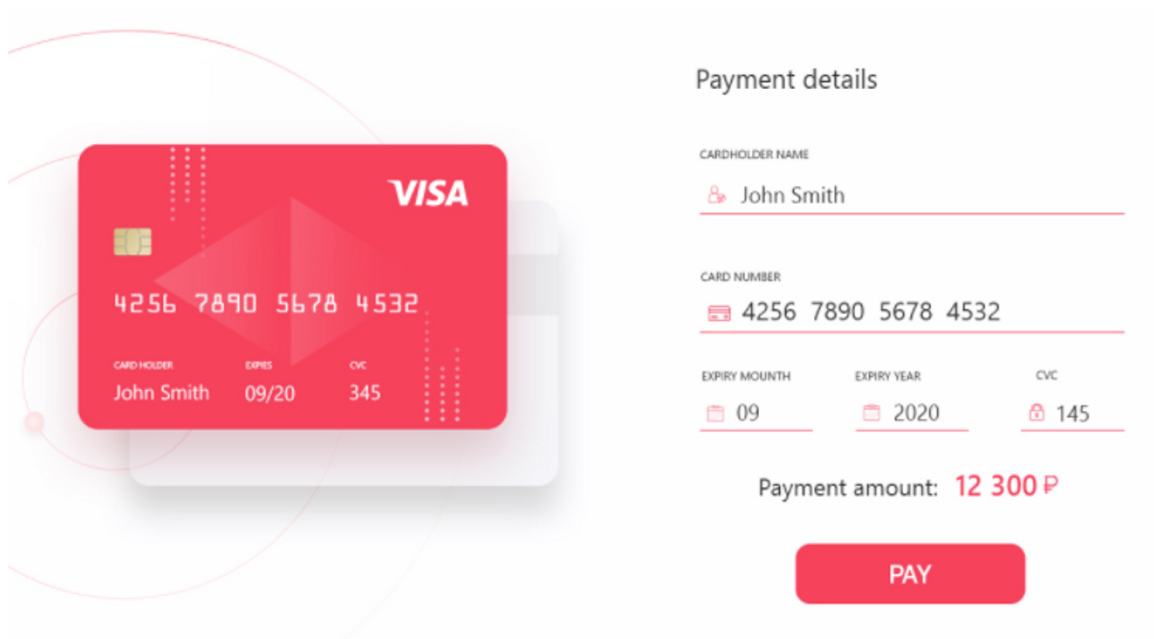

- Read entire question carefully for at-least 15 mins, understand it and then code it.
- Commit your code every hour with proper commit message to your repository (we will monitor every commit)
- Use HTML, CSS and JS DOM to solve this question.
- Usage of React will lead to disqualification.
- Make Good UI, use pure CSS, don't use any external libraries (good UI will fetch you extra marks)

Problem Statement:

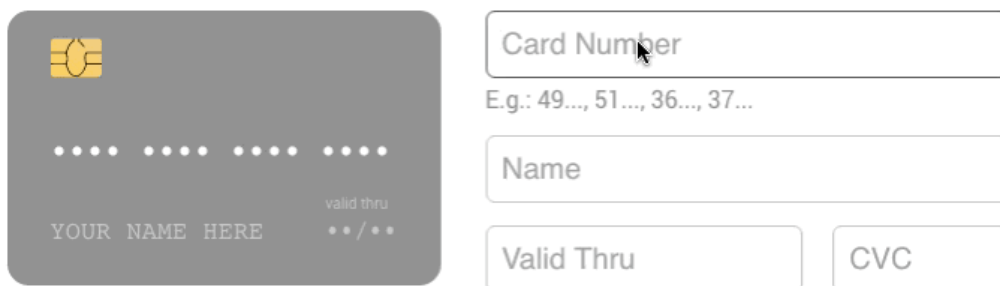

- Your app should have two pages
 - Credit card page (card.html)
 - OTP page (otp.html)

Credit card page

- You should build credit card component in Credit card page which looks similar to below image

- You should create credit card on left hand side and form on right hand side
- When user types in values in form, it should be reflected in the credit card.
- You can see a demo below

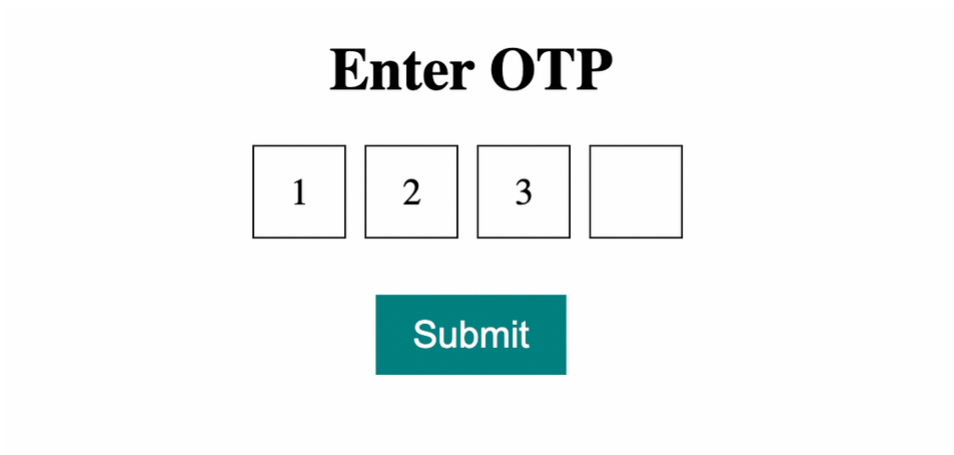

- You should use pure CSS.
- After filling all details of card, when user clicks on Pay redirect to `otp.html`

OTP page:

- You should build OTP pin component for entering OTP.

- It should look like

- When user starts typing any number, user should be able to type in the first box and it should move the user to the next box.
- Example on how it should move to next box.

- Take dummy OTP as 1234, when user types in 1234 and after clicking on submit, show an alert "Success"

Submission

- Please submit deployed link and Github link of code.
- Push your code into `masai-repo`, don't submit personal repo links.
- Please double check if deployed version works or not (run deployed version on your laptop and then submit it)
- Any issues in deployed link, will be considered null and void.

- Please verify your submissions are correct.
- Make sure you follow all instructions carefully.
- Submit before deadline.

Rubrics / Criteria to be judged upon

- HTML, CSS, Javascript
- UI (bonus marks will be given for decent UI)
- Code cleanliness
